Non peer reviewed publications

July 2022 **Here are the most effective things you can do to fight climate change**, *Guest post for the Conversation*, link

November 2021 **What 100,000 studies tell us about climate impacts around the world**, *Guest post for Carbon Brief*, [link](#)

Software

- NACSOS **A Django site for managing collections of documents, screening or coding them, and doing NLP tasks with them like topic modelling or classification**, <https://doi.org/10.5281/zenodo.4121526>
- Climate and Health Map **An interactive site built with Dash to present the results of a machine learning-assisted systematic map of climate and health literature**, <https://apsis.mcc-berlin.net/climate-health/>
- The Homero-manteion **A digitized version of the ancient method of divination using Homeric poetry**, <http://homeromanteion.com/>
- BuscarR **An R package to support safe early stopping during machine learning prioritised screening**, <https://mcallaghan.github.io/buscarR/>
- Buscarpy **A Python package to support safe early stopping during machine learning prioritised screening**, <https://buscarpy.readthedocs.io/>

Conferences and Talks

- Conference Presentation **Evidence Synthesis Methodologies for accelerated learning on what works in climate**, *Global Evidence Summit*, Prague, September 11 2024
- Poster Presentation **The safe use of LLMs for automated screening**, *Global Evidence Summit*, Prague, September 11 2024
- Invited Keynote **Opportunities and challenges in using NLP to assist evidence synthesis**, *Text-as-data in Hydrology, Natural Hazards, and Climate Change Research*, Potsdam, March 1 2024
- Poster Presentation **BUSCAR: Biased Urn-based Stopping Criteria for technology Assisted Reviews**, *Cochrane Colloquium*, London, September 6 2023
- Invited Talk **Natural Language Processing for climate change texts at the science-policy interface**, *Climate Change AI Berlin Brandenburg*, Berlin, July 6 2022
- Invited Webinar **Machine Reading the Growing Climate Science and Adaptation Literature**, *Climate Change AI*, Online, May 13 2022
- Invited Webinar **A database of 100,000 studies on attributable climate impacts derived with machine learning: methodology and potential uses or follow-up analyses**, *PROCLIAS - Process-based models for climate impact attribution across sectors*, Online, May 09 2022
- Invited Talk **Statistical stopping criterial for automated screening in systematic reviews**, *Evidence Synthesis & Meta-Analysis in R*, Online Conference, January 18 2021
- Conference Presentation **Machine learning for systematically mapping the climate change literature**, *Applied Machine Learning Days*, EPFL, Lausanne, February 01 2020
- Conference Presentation **A Topography of Climate Change Research**, *EGU*, Vienna, April 09 2019

Conference **A Topography of Climate Change Research**, *EASST*, Lancaster, July 26 2018
Presentation
